TECHNICAL INFORMATION

TYPOLOGY

- C/R — RED BODY CERAMIC TILES
- C/W — WHITE BODY CERAMIC TILES
- G/W — GRES WHITE BODY TILES
- G — GLAZED PORCELAIN TILES
- UG — UNGLAZED PORCELAIN TILES

EDGE

- STRAIGHT
- SHAPED
- RECTIFIED

SURFACE STRUCTURE

- S — SMOOTH
- LS — LIGHT STRUCTURE
- HS — HEAVY STRUCTURE

FINISH

- N — NATURAL
- L — LAPPATO
- FL — FULL LAPPATO
- P — POLISHED

SURFACE LOOK

- M — MATT
- S — SATIN
- G — GLOSSY
- HG — HIGH GLOSSY

INDICATIONS FOR USE

- WALL TILES
- FLOOR TILES

SUGGESTED APPLICATIONS

- DOMESTIC PURPOSE
- OUTDOOR
- LIGHT COMMERCIAL TRAFFIC AREA
- HEAVY COMMERCIAL TRAFFIC AREA
- INDUSTRIAL TRAFFIC AREA

In printing, colour of the products may differ slightly from actual, pictures are only for reference.

ROOM FOR IMAGINATION

RAK CERAMICS

ROOM FOR IMAGINATION

At RAK Ceramics we help to create icons, we help to build marvels and our products feature in some of the most iconic buildings in the world.

We are known for our wide product range and our ability to produce bespoke ranges for both small and large scale projects, enabling our clients to bring their ideas to life.

We respect, we inspire, we improve, we deliver; today, tomorrow, no matter the ambition, no matter the challenge, at RAK Ceramics we take care of all the details, however large or small, so you don't have to.

Our passion and expertise combined with this careful attention to detail enables us to provide you with a wide range of integrated ceramics solutions, allowing you freedom to be creative and plenty of room for imagination.

THE COMPANY

RAK Ceramics is one of the largest ceramics' brands in the world. Specialising in ceramic and gres porcelain wall and floor tiles and sanitaryware, we produce 110 million square metres of tiles and 5 million pieces of sanitaryware per year at our 16 state-of-the-art plants across the United Arab Emirates, India, Bangladesh and Iran. Headquartered in the United Arab Emirates, we serve clients in more than 150 countries through our network of operational hubs in Europe, Middle East and North Africa, Asia, North and South America and Australia. Across our global operations we employ approximately 15,000 staff from more than 40 nationalities. We are a publically listed company on the Abu Dhabi Securities Exchange in the United Arab Emirates and on the Dhaka Stock Exchange in Bangladesh and as a group have an annual turnover of approximately US$1 billion.

PRODUCT GUIDE

TECHNICAL FEATURES

RED BODY AND WHITE BODY CERAMIC TILES (BIII):

Red body and white body Ceramic tiles are made with fi quality clays and with chamotte (a ceramic raw material with high percentage of silica). These raw materials are submitted to dry grinding and suitably mixed and wet and then pressed with hydraulic presses. Quick-cycle support firing is obtained via roller kilns reaching temperatures of approximately 1100 °C. After biscuit glazing, the vitrified product is sintered in a single-layer roller kiln at approximately 1030 °C. The resulting wall tiles have an average bending strength that is higher than 15/ mrre in accordance with the UNI EN ISO10545-4 standard and a water absorption level that is higher than 10 %; they belong to the Blll (GL) group according to the UNI EN 14411 standard. This class of products shows virtually no shrinkage during firing; therefore such dimensional consistency results in extremely easy laying.

ADVICE ON LAYING

Ceramic Red/ White body tiles can be laid using either tile adhesives or cement mortar. Under no circumstances should the tiles be wet before laying when using acrylic or vinyl resin based adhesives or two- component organic solvent based adhesives. When laying large sized tiles it is best to adopt the two layer spreading method and, when the laying surface is very large, to provide for suitable expansion joints which must not be spaced more than 4-5 linear meters apart from one another.

IMPORTANT POINTS TO REMEMBER WHILE LAYING THESE TILES

- When laying on wet concrete or plaster, leave to dry for at least one week for each centimetre of thickness.
- When laying on brick, never lay on tile adhesive measuring more than 4-5 mm in thickness. For laying on flexible supports (for example plasterboard panels, polymer panels, etc.) which may result in movement of the tiles, we advise laying on tile adhesive measuring no more than 2-3 mm in thickness and to use class C2 or D1 glues.
- For laying on waterproof brick, which prevents the release of damp, we advise laying on tile adhesive measuring no more than 3 mm in thickness and to use class C2 or D1 glues.
- Avoid laying without expansion joints or joints where stress due to expansion is released directly onto the tile.

	Scratch Hardness : (Moh's)	EN 101	-	4 - 6

PRODUCT GUIDE

TECHNICAL FEATURES

GRES WHITE BODY TILES (BIIa) :

Gres white body tiles are created by mixing raw materials including high quality white or red clays, quartz and feldspar in wet grinding ball mills. After grinding, a clay-based suspension of these materials called a slip is fed out of the mill then spray-dried to remove excess moisture. Following the spray drying process, the free flowing powder is pressed using advanced hydraulic presses with a specific pressing power exceeding 300 kg/cm2 in order to obtain a compact gres body. Once dried, the tiles are coated and decorated with glazes to make them aesthetically pleasing and meet our customers design requirements.
The glazed tile body is then fired in roller kilns where temperatures of approximately 1200 °C are reached. The resulting product is normally a medium-to-low porosity (3% to 6%) tile, in compliance with the UNI EN 14411 standard and rated as belonging to the BIIa GL group with notable technological specifications such as the product flexural strength (average value: 30N/mm2 according to UNI EN ISO 10545-4).
As for wear resistance, this will depend on the type and colour of glazing and may change according to different products or collections. As a general rule, bright Finishes are not recommended for heavy traffic floors or rooms opening onto outdoor areas, where sand or other abrasive materials are more likely to be brought in.

ADVICE ON LAYING
Our gres white body tiles can be laid using either traditional cement mortar or modern tile adhesives. When laying large size tiles, it is best to adopt the two-layer spreading system to ensure the adhesive is spread over 90 % of the tile surface.
Quickly dipping each tile in water before installation will remove any dust on the back of the tile for perfect adhesion, however, do not wet the tiles if you are using vinyl, acrylic resin adhesives or two-component organic-solvent based adhesive.
It is advisable to always incorporate suitable shrinkage-flexion joints (movement/expansion joints) which must not be spaced more than 4-5 metres apart from one another. These joints must be inserted not only between the tiles, but also reach the levelling compound below, consisting of either cement mortar or dry compound, depending on whether the tiles are set in the traditional manner or using a modern adhesive. The movement joints must be sealed with appropriate materials such as silicone or polyurethane-based sealants, depending on the anticipated traffic of the application area.
Appropriate tile bedding layers should be used such as underlay, damp course, vapour barrier or any other layer necessary to prevent the tiles from detaching themselves or cracking due to water penetration.

TECHNICAL CHARACTERISTICS - GRES WHITE BODY TILES (BIIa)

	Test Description	Standard Test Method	International Standard ISO 13006	RAK Ceramics Specifications
	Length & Width	BS EN ISO 10545-2	+/- 0.6%	+/- 0.3%
	Thickness	BS EN ISO 10545-2	+/-5.0%	+/- 5.0%
	Rectangle Squareness	BS EN ISO 10545-2	+/- 0.5%	+/- 0.4%
90°	**Straightness of sides**	BS EN ISO 10545-2	+/- 0.5%	+/- 0.3%
	Surface Flatness	BS EN ISO 10545-2	+/- 0.5%	+/- 0.3%
H_2O	**Water Absorption**	BS EN ISO 10545-3	3% < E <= 6%	3% <E <= 6%
	Modulus of Rupture	BS EN ISO 10545-4	>=22 N/mm2	>=30 N/mm2
KG	**Breaking Strength**	BS EN ISO 10545-4		
	Thickness > = 7.5mm		>=1000N	>=1000N
	Thickness < = 7.5mm		>=600N	>=700N
	Resistance to surface abrasion	BS EN ISO 10545-7	Manufacturer to state Abrasion Class	Class 2 - 4
+ -	**Resistance to Thermal Shock**	BS EN ISO 10545-9	No visible defect	No visible defect
	Crazing Resistance	BS EN ISO 10545-11	No crazing	No crazing
	Resistance to chemicals	BS EN ISO 10545-13	No visible effect	No visible effect
	Resistance to stains	BS EN ISO 10545-14	Manufacturer to state class	Stain removed Min. class 4
	Scratch Hardness : (Moh's)	EN 101	-	4 - 6

Note : **Shade variation across the batches is inherent to the manufacturing process and the pre-laying colour comparison is recommended**

PRODUCT GUIDE

MAINTENANCE AND CLEANING OF TILES

Maintenance of ceramic and porcelain tiles on dry surfaces is relatively easy. RAK Ceramics tiles are highly scratch and stain resistant.

- By regularly sweeping the floor, you can help avoid scratches that small pebbles or sand can create.
- Make it a habit to always wipe the soles of your shoes on a mat before entering the house. Thoroughly wipe up any spills using plain warm water.
- While they are not likely to stain your ceramic tiles, spills may stain the grout between the tiles and if they are left to sit for too long, may also stain the actual tiles.
- Plain water is the ideal cleaner because it leaves no residue if you dry the surface of the tiles thoroughly after cleaning.
- If tiles are left wet after cleaning, there may be some unsightly mineral residue after the water dries, but this can easily be removed by spot cleaning.
- If stains resist cleaning with water alone, you can use a mild acidic solution, such as white vinegar. Use it highly diluted and rinse with plain water then dry.
- As food stains are acidic in nature, try using a mild alkaline solution.
- Use common detergents sparingly, rinse with plain water and dry thoroughly.
